Welcome!

Thank you for visiting University Printing Services.

This Guide has been produced to inform you of some of the many products and services that we can provide for you.

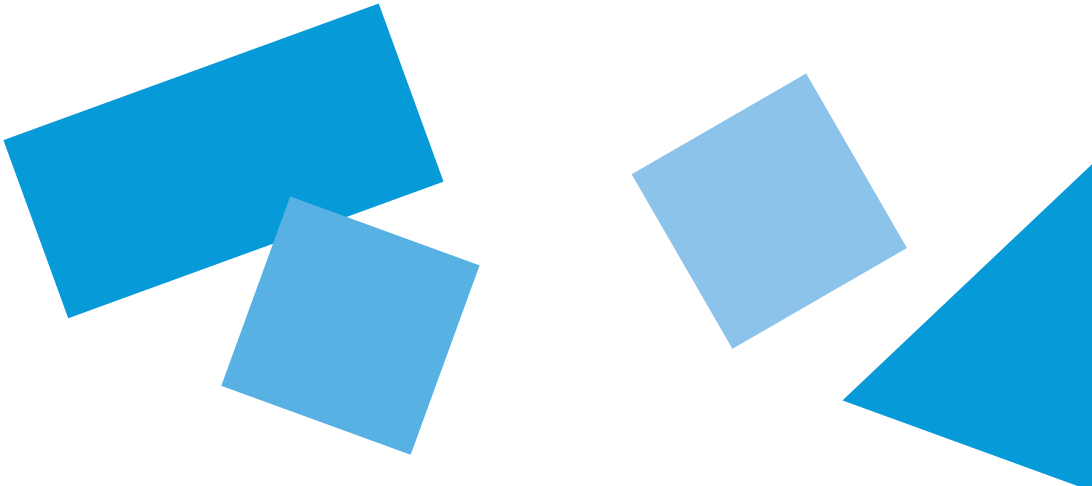

The Printing Services team manage a wide range of print and document management services for the University. In the previous financial year, Printing Services dealt with 4,484 separate print requisitions from University departments alone.

These requests cover everything from the supply of paper through to huge exhibition graphics. From print-on-demand flyers, to our prospectuses. From your business card, through to all marketing literature, and internal and external signage.

We also manage the print requirements for strategic city partnerships, including Portsmouth City Council and the NHS, further education establishments, and schools and colleges.

But it's not just about print. We also provide additional services including artworking and Electronic Document Management (EDM) archival scanning solutions and metadating.

The benefit of all this activity is reflected in our pricing, which we actively benchmark. This pricing has remained unchanged since 2011 and is up to 64 per cent cheaper than the high street which directly helps our students with the cost of their printing requirements e.g. dissertations, portfolios, thesis, posters etc.

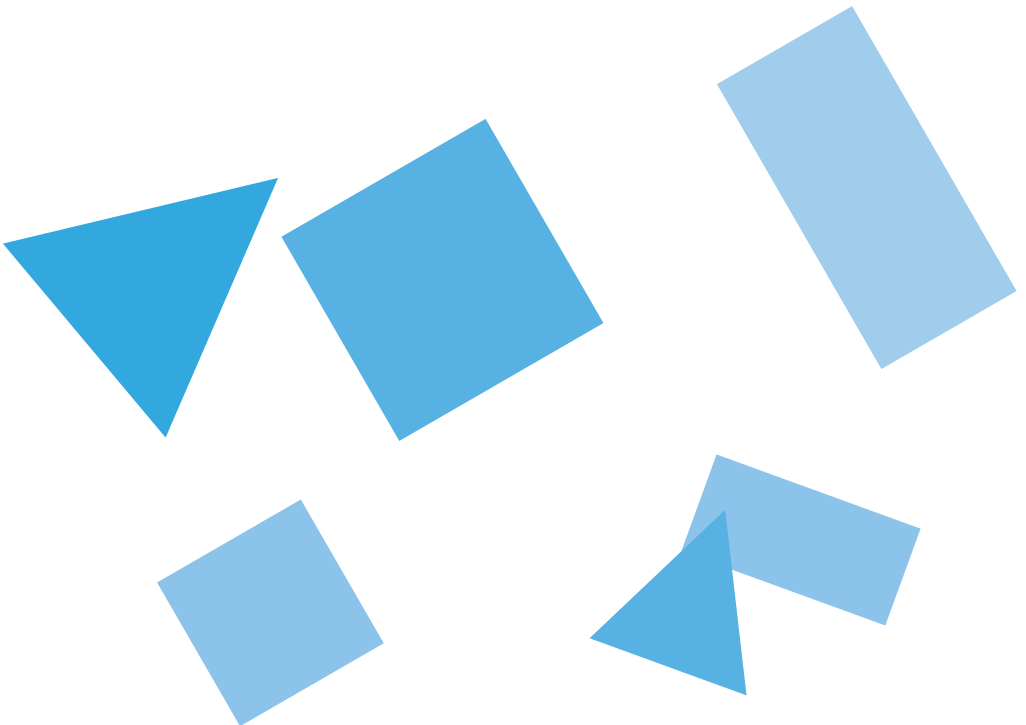

In addition, these price benefits are available to **everybody** who uses the service – **for both work and home**. Here are some examples of the products we have produced for students, staff and alumni in the past:

- Posters
- Canvas Prints and Framing
- Wedding invitations and envelopes
- Postcard invites
- Photographic prints/Photobooks
- High definition scanning and reproduction
- Print-on-demand self publishing books
- CD and DVD music and video printing and fulfilment
- Birthday banners
- Stationery and small business materials etc.

Importantly, you can now access the service 24/7 from wherever you are through our online store. You can select the category of print you require and pay through the store. It could not be simpler.

So whatever your printing needs please get in touch, as we are here to help support you.

Dissertation printing and binding

Printing Services follows all University of Portsmouth regulations for the printing and binding of dissertations.

This includes having a unique pricing mechanism whether your dissertation is black and white or colour, or a mix of both, to give you the most cost effective production available.

We also carry all the exact colour card materials required by your different faculties and departments for your cover use. We have printed CDs with glued in slipcases available, as well as integral back pockets for those required to submit additional large materials e.g. maps, drawings.

For a full breakdown of our complete dissertation pricing please see the inside back cover for details.

Here are the two options for using the Dissertation Printing and Binding service:

1. Use the Online Store

Our dissertation service which is used by hundreds of students each year is the most popular item on our online store at www.port.ac.uk/webtoprint/pay because all the queues can be avoided.

All the different options are available on the store so you can choose the size of your dissertation and cover requirements, any additional features such as CDs etc. then purchase through the store.

All orders received through the online store are ready for collection within 48 hours (Monday–Friday). As part of our service you will receive a call when your dissertation is ready for collection, enabling you to visit the service just once to collect your finished items.

Be smart... if you need to include a signed declaration form as part of your dissertation, complete it and obtain a clear image of it (scan or photograph it) and include it within your PDF.

2. Visit us to use the Drop-and-Go service

We also offer a 'Drop-and-Go' service for those of you not using the online store. This enables you to visit reception and complete a dissertation Print Requisition form in writing. Please bring your dissertation in PDF format on a USB stick for submission. This will be kept with your job during the production process and returned to you when you collect and pay for your dissertation.

Please note all orders received through our 'Drop-and-Go' service are subject to turnaround times set daily on the day of dropping off the work. While it is aimed that maximum turnaround times are kept in line with those of the online store, e.g. 48 hours, at peak times our 'Drop-and-Go' service turnaround times may extend beyond this.

Print management

Some publications require external print management.

The Printing Services team prepare external print specifications for quotation that are issued to our external vendor base to respond to. This supplier base has been selected through a University Purchasing-led European tender involving the British Printing Industries Federation.

The team review all quotations from all suppliers, placing the job at the most competitive price, and manage your print project from inception through to delivery, to meet agreed deadlines.

Multi Functional Devices for your department

Multi functional devices (MFD) copy, print and scan and are cheaper to run than office printers. The devices come complete with full service support and are inclusive of all toner and replacement parts. We can undertake print audits of your departmental printer(s) and specify the correct MFD for your requirements.

Scanning and printing

We can undertake high volume scanning to convert all your hard copy documents to digital files for your reference, should you wish to print them or not, and can input them and code them into the University's Electronic Document Management (EDM) solution on your behalf. Please get in touch to discuss your requirements.

Large format scanning, additional metadata and EDM placement from £1.15

Our scanning technology also allows us to create a high definition file of any valued picture that you may own and produce a quality reproduction of that image on our high quality digital printers on a range of different materials – a canvas, for instance.

Scanning any image of this type up to A0 size is from £4.00 per scan

Marketing and promotion materials

We work very closely with our colleagues in Corporate Communications to ensure that your request for any marketing and promotional materials is managed professionally and in line with the University's Corporate Identity Guidelines.

If you are planning any marketing or promotional materials please email corporate.communications@port.ac.uk in the first instance, and we will work together with our colleagues to deliver your requirements.
