British Feeding and Drinking Conference, Portsmouth 2014
Draft Programme

Day 1: Thursday 3rd April

0830  Registration & refreshments at the Holiday Inn, Pembroke Road, Portsmouth

0920  Welcome

Session 1: Healthy Eating And Drinking

0930  Response inhibition training to reduce overeating: Translational studies from the lab to real life - Natalia Lawrence

0945  Preventing the pack size effect: Effectiveness of serving size recommendations - Iris Versluis

1000  Facing temptation in the bar: counteracting the effects of self-control failure on alcohol intake - Roel Hermans

1015  Dieting vs. Adaptive Eating: Psychophysiological Mechanisms of Interoception and its Relevance for Intuitive Eating - Beate Maria Herbert

1030  Targeting impulsive processes of eating behaviour via the internet: Effects on body weight - Harm Velig

1045  I'm watching you: why we might need to lie more to participants in eating behaviour experiments - Eric Robinson

1100  Tea/Coffee break

Session 2: Postgraduate Bursary Talks A
(10min slots inclusive of 3mins for questions)

1130  Matching effect in food intake: The role of food type and familiarity of dining partners - Panagiota Kaisari

1140  Moderating effects of cognitive resource depletion on cognitive and mood effects of glucose and caffeine in combination - Bernadette Robertson

1150  Selective neural and satiating effects of the 5-HT2C receptor agonist meta-chlorophenylpiperazine (mCPP) in healthy females - Jason Thomas

1200  Therapeutic potential of phytocannabinoids for cancer anorexia-cachexia syndrome - Dan Brierley
Impact of experienced and internalised weight stigma on eating behaviour and psychological outcomes - Angela Meadows

The role of interoceptive awareness in decisions about portion size - Greg Keenan

Umami flavour enhances appetite but also increases satiety - Una Masic

The effect of dietary fibre and meal variety on children’s energy intake - Vasiliki Sinopoulou

Emotional eating as a case of Pavlovian learning: does negative mood facilitate appetitive conditioning? - Peggy Bongers

1300 -1355 Lunch

Keynote Speaker 1: Thomas Hummel: The chemical senses and eating behaviour

Session 3: Sensory Dimensions In Eating

Effects of product labelling on eating topography, satiation and satiety - Matt Bosworth

Metabolic influences on odor sensitivity - Sanne Boesveldt

‘Natural’ variations in eating topography and food intake- Danielle Ferriday

The effect of sensory-nutrient congruency and uncertainty on food intake - Pleunie Hogenkamp

In search of flavour-nutrient learning: A study of Samburu pastoralists in North-Central Kenya - Jeff Brunstrom

Poster session with refreshments

Session 4: Children And Food

Learning to like vegetables during weaning: the role of early, varied and repeated exposure on liking and intake - Marion Hetherington

If it contains fruits or a lot of water it must be healthy: Parents and children’s health perception of beverages - Tamara Bucher

The role of attentional bias in the effect of food advertisements on actual food intake among children - Frans Folkvord

1800 BFDG business meeting: All welcome

1900-2400 Conference Dinner, on board HMS Warrior, Historic Dockyard, Portsmouth
Day 2: Friday 4th April

Session 5: Postgraduate Bursary Talks B
(10min slots inclusive of 3mins for questions)

0900   Tasting ‘calories’ differentially affects brain activation during hunger and satiety - Inge van Rijn

0910   Food or Fluid? The context of consuming a beverage influences satiety - Keri McCrickerd

0920   Partial reinforcement of food cues, impulsivity, and the learning and unlearning of conditioned appetitive responses. Possible implications for unsuccessful dieting - Karolien van den Akker

0930   Investigating the efficacy of parent-led repeated taste exposure, incentives and modelling interventions at increasing children’s acceptance of a disliked vegetable - Clare Holley

0940   Portion size selection and snack food preferences; inter-relationships between parent and child BMI - Christina Potter

0950   Brain reward response to the sight and smell of food - Suzanne de Bruijn

1000   Satiety effects of sugar-containing drinks - Nouf Gadah

1010   The role of a milkshake preload in subsequent behavioural impulsivity - Aaron Brace

1020   “Emotional and functional conceptualisations for beer, wine and non-alcoholic beer consumption in The Netherlands and in Portugal” - Ana Patricia Silva

1030   Poster session with refreshments

1120   **Keynote Speaker 2: Robert Boakes:** Metabolic and behavioural consequences for the rat of drinking 10% sucrose solution

Session 6: Factors In Satiety

1200   Examining the neural basis of the post-ingestive anorectic effect of phenylalanine and aspartic acid - Elanor Hinton

1215   Expected satiation of liquid vs. solid calories - Sarah Davies

1230   Modulation of sweet preference by the post-ingestive outcomes of eating - Ashley Martin

1245   Physiological signals measured by food- and time-specific expected satiety - David Booth

1300 -1355   Lunch

**Poster Presentations**

2. Differential effects of water supplementation on cognitive performance: dose-response characteristics - Caroline J Edmonds
3. The effect of exposure to an unfamiliar fruit and positive or negative message on consumption and attitude change in young children - Paula Booth
4. Cognitive and mood improvements following acute supplementation with purple grape juice in young, healthy adults - Haskell-Ramsay CF
5. Impact of tongue tie surgery on infant feeding behaviour - Gretel M Finch
6. The paradox of the choice paradox - Janneke C. A. H. Giesen
7. The relationship between drug use, food neophobia and food addiction - L.J. Nolan
8. Individual differences in glucose facilitation of cognitive function - N. Scevoli
9. Measuring satiety effects: study design makes a difference to the results - P. J. Rogers
10. Eating and Electroshocking out of Boredom - Remco C. Havermans
11. An Online Approach to Increasing Healthy Eating - Jade Elliott
13. Dose-response effects of a berry juice extract on mood and cognition in young healthy adults - A.W. Watson
14. Attitudes towards emotional expression, emotion regulation and eating psychopathology - Emma Sharpe
15. Effects of food variability on expected satiety - E. Van den Heuvel
16. “I perceive myself to be a food addict”: A Qualitative Exploration of the ‘Food Addiction’ Concept - Helen K Ruddock
17. Food addiction, myth or reality?: The effects of priming beliefs about food addiction on self-diagnosis and consumption - Helen Ruddock
18. Investigating the effects of acute water supplementation on cognitive performance and mood in young and older adults - Natalie A. Masento
19. A network approach to modelling overeating - Bastiaan Boh
20. Illness Perceptions and Obesity: Obesity Related Illness Representations Vary According to BMI Category - Karen Robinson
21. The effect of health messages on impressions of beverage characteristics, expected satiation and satiety and intake - Peter Hovard
22. The role of attentional bias in the effect of food advertisements on actual food intake among children - F. Folkvord
23. Visualising healthy eating: A role for enjoyment in the use of visualisation for increasing fruit consumption - KM Appleton
24. Women who report to be fast eaters have higher BMI, waist circumference and body fat: validation and results of questioning eating rate in an observational study - Monica Mars
25. Hedonic hunger and food cue reactivity in an obese sample commencing weight management - Bethan R Mead
26. Can advertising ruin our self-control? The effects of inhibitory control training and food advertising on snack food consumption - KL Lister
27. An experimental study to investigate whether the presence of brand equity characters on food packaging affects children’s taste preferences and choices - Lauren McGale
28. Does breakfast size affect cognition, mood and appetite following morning exercise in active females? - Rachel C. Veasey
29. Do television food adverts increase eating in the absence of hunger behaviours in children? - Rosa Whalen
30. Reducing food consumption by training inhibitory control - Rachel C. Adams
31. Seafood Inclusion in Early Years Feeding: A review of Information Resources - Sharon A. Carstairs

32. Food choice: the battle between package, taste and consumption situation - Swetlana Gutjar

33. Operant-conditioned food-associated stimuli modulate feeding in humans - T. Ridley-Siegert

34. All in time: Temporal changes in attentional processing of food stimuli related to appetite level and food consumption. - Graeme R Davidson

35. Delay Discounting, Response Inhibition And Trait Impulsiveness: Which Aspects Of Impulsivity Predict Overeating And Overweight? - Menna Price

36. Interoception and Energy Intake: the mediating role of perceived hunger - J. M. Brunstrom

37. Effects of time orientation and construal level on eating and exercising behavior - Jannette van Beek

38. Refining personality-BMI associations by testing for measurement independence - Uku Vainik

39. Segmentation based on meal experience in vital independent living elderly consumers - Louise den Uijl

40. Two Effects Of Sensory Anticipation, Assimilation And Contrast, Are On The Same Scale Of Anticipated- Experienced Pleasure Divergence - O. Davidenko

41. Effect of an immediate pre-meal water preload on voluntary energy intake in non-obese Robert A Corney
